

RISK WARNING STATEMENT FOR TRADING IN CRYPTOCURRENCY FUTURES

If you require further information, you should refer to the relevant offer documents, contract specifications and risk disclosure/warning statements provided by the issuer or relevant counterparty of these cryptocurrency futures. Please also be aware of potential counterparty risk involved as, OCBC Securities Private Limited (“OSPL”) is not the issuer of such products.

Trading in cryptocurrency related products (including cryptocurrency futures) carries a high degree of risk. This statement may not be sufficient to explain and list down all the risks associated with the trading and/or investing in cryptocurrency futures. You should only trade, deal or invest in cryptocurrency futures if you understand your exposure to all the potential risks involved and you should consider whether such trading is appropriate for you in light of your experience, objectives, financial resources and other relevant circumstances. You should not rely on this information as a complete explanation of the potential risks involved in trading, dealing or investing in cryptocurrency futures. These risks may include but are not limited to, higher price volatility, lack of price transparency, cyber security risks, unregulated status of payment token spot trading market, and some cryptocurrency related products may not be subject to equivalent regulatory requirements as those usually applicable to other investment products.

The underlying cryptocurrency markets are highly susceptible to the market forces of supply and demand, and generally they are not backed/supported by any central bank or government. Thus, they are much more volatile than traditional currencies. The value and liquidity of cryptocurrency and cryptocurrency related products may fluctuate greatly as they are largely derived from, or highly dependent on the level and volume of participation from both buyers and sellers. These products may be restricted and subject to significant limitations on resales and transfers. Trading in these products can be extremely risky. You should be prepared to lose all of the funds used for trading in cryptocurrency related products. You should not fund your trading activities in these products with retirement savings, emergency funds or funds set aside for purposes such as education or home ownership. You should carefully consider the products’ features, risk factors, fees and expenses before investing.

Transactions in cryptocurrency futures are typically carried out on a margin basis and borrowing to finance trading transactions (including, but not limited to, leveraged trading or gearing) can be very risky. You may lose all or more than the amount invested. A small adverse movement in market prices may result in losses substantially exceeding your initial margin. You may be required to deposit additional funds on short notice to maintain your position. If you fail to comply with such margin calls, your position may be liquidated or closed, and you will be liable for any resulting deficit in your account. Cryptocurrency futures may at times lack sufficient liquidity. Under such conditions, it may be difficult or impossible to execute or close out a position at a desired price or at all, and execution prices may deviate significantly from quoted prices. Market disruptions, trading halts, system issues or regulatory actions may further restrict your ability to trade or manage your positions. The use of risk management tools or strategies, including stop loss or limit orders, does not guarantee that losses will be limited as such stop loss or limit orders may not be executed due to market conditions, price gaps or insufficient liquidity.

Where necessary, you should seek advice from an independent financial adviser regarding the suitability of any trade or investment product, taking into account your investment objectives, financial situation and particular needs, before making a commitment to trade or purchase the investment product. If you choose not to seek independent financial advice, you should carefully consider whether the trade or product is suitable for you. You should consider carefully and exercise caution in making any trading decision whether or not you have received advice from any

financial adviser. You should also read all relevant offer documents, contract specifications or terms and risk disclosure/warning statements prior to making any trading or investment decision. Past performance, yields and payments, as well as, any prediction, projection, or forecast are not necessarily indicative of the future or likely performance, yields and payments of the cryptocurrency futures.

Where cryptocurrency futures are denominated or settled in currencies other than your base currency, your profit or loss will be affected by fluctuations in foreign exchange rates. Settlement delays, system disruptions or failures of clearing or settlement mechanisms may also adversely affect transaction outcomes.
